Innovation in and out of parlour

Pulse-8 Pulsation System

The ATL Pulse-8 pulsation system is simple and easy to use. It is compatible with most claw, liner and teat cup shell combinations. The system is designed to fit all types of parlours, new and old, high and low level, and can be used with cows, sheep or goats.

The Pulse-8 control has a built-in power supply able to control up to 40 pulsators, reducing system and installation cost on larger parlours.

Innovation in and out of parlour

Easy to Use

- Pulsation settings are easily adjustable from the front of the box, no fiddling inside
- Precision settings for pulsation rate and ratio
- LED display, keys and channel ON indicators on front panel of Pulse-8 control
- Link to ATL milk meter allowing pulsators to be turned on and off from wash box

Precision Control

- Pulsation rate from 30 to 180 pulses per minute (ppm) in 1ppm steps
- Pulsation ratio selectable in 1% steps from 35:65 to 75:25 (On:Off)
- Save electricity with the built in 80% efficient switch mode power supply
- Suitable for any claw pulsation pattern - simultaneous, alternate or diagonal

Stable Vacuum

- Pulse-8 control provides 8 time shifted pulsation periods for ripple pulsation effect
- Reduces noise by off setting operation of pulsators
- Spreads out air consumption and removes vacuum fluctuations
- Provides better pulsation and improves milking

Low Service Pulsator

- Easy to clean and maintain
- 12-volt pulsator has low power consumption
- Rapid, precise pulsation and long service life
- Low maintenance with few service parts
